Dear Authorized Officer,

I am currently a 4th year undergraduate student in the Molecular Biology and Genetics department at Izmir Institute of Technology. After completing the majority of my studies and internship, I figured out that I am way more interested in computers involved things; automated programs, pipelines for data exploration and creating small web-pages.

Until today, I was able to gain experience in different laboratories as well as distinct projects. Exemplary, I had opportunities to work in bioinformatics, plant genetics and functional genomics laboratories previously. Last few projects that I worked on were mainly focused on manipulating big biological data and creating a complete workflow with R and Bash scripts.

After gaining some experience, I decided to take an U-turn and started to build more IT-related skills such as HTML&CSS&JavaScript. I got certificates from well-known universities across the globe at Coursera and Codecademy platform. Yet, I am taking more courses for building foundation and trying to create new web-sites to practice my skills. Nowadays, I am able to make basic web sites with a clean and subtle style.

I am positive about changing my career path and ready to take action. I am totally eager to create and push my limits to learn. I am thankful to my friend Ömer Gülen who supported my development into web development. A work experience in Jotform would both enlighten my personal and career path development. In addition, this work experience would allow me to melt two different fields, science and creativity into one pot. After a research about the company's structure, I learned Jotform has a multi-disciplinary team from different educational backgrounds. Being an addition to Jotform's interdisciplinary mosaic would be a great experience and pleasure for me.

I was wondering whether you could consider my wish of being a part of your team starting immediately. I would greatly appreciate it if you could review my request. My CV is attached to mail.

Thank you very much in advance

I am looking forward to hearing a favorable reply from you.

Yours sincerely,
